

FSR TAA & BABAA Compliant Products

What are BABAA compliant products?

BABAA (Build America, Buy America Act) compliant products are manufactured in the United States and meet strict requirements for sourcing materials and production. BABAA was established to strengthen domestic manufacturing, requiring that iron, steel, manufactured products, and construction materials used in federally funded infrastructure projects be produced in the U.S. This ensures greater investment in American industry and supports local jobs.

What are TAA compliant products?

TAA (Trade Agreements Act) compliant products are those that are manufactured or “substantially transformed” in the United States or in a TAA-designated country with which the U.S. maintains a trade agreement. These products are recognized as reliable procurement sources and are approved for use in U.S. government projects and facilities.

FSR Federal Solutions

FSR's wide range of innovative AV, power, and infrastructure products is designed to meet both TAA and BABAA compliance standards, making them ideal for use in federal government projects. From mission-critical command centers to secure conference rooms and classrooms, FSR delivers dependable, American-made solutions that align with strict procurement requirements. With decades of expertise and a commitment to quality, FSR is a trusted partner for the federal government, offering compliant solutions that ensure performance, reliability, and long-term value.

Floor Solutions

FSR's floor solutions provide seamless power and connectivity in any environment. Built for durability and easy integration, they keep AV connections out of sight while ensuring convenient, reliable access where you need it most.
