Collaboration is as simple as 1, 2, 3

Yes, it’s that simple!

FSR’s new HuddleVU Collaboration Kits take the work out of designing elaborate systems. With four different pre-packaged systems, integrators can choose the appropriate configuration for their customer’s needs with kits accommodating from two to four users. Each kit comes complete with all the necessary hardware, including an FSR Harmony table box available in a choice of aluminum or black finishes, a switcher and all required cables finished with color coded end rings to designate proper cable to switching connections. HuddleVU Kits can also be upgraded with optional retractors.

You pick the furniture and monitor. We’ll take care of the rest.
Create an attractive and functional collaborative work environment with our HuddleVU Kits.

Excellent switching capability, easy installation and systems to fit every budget!

Only from FSR’s HuddleVU.

LIFT THE COVER

Plug in Laptop or Mobile Device

Push the button

Collaborate

Each Harmony table box is provided with an instructional card insert installed in the cover for ease of operating your HuddleVU Kit.

Cable Color Coded

All HuddleVU Kit cables are finished with color coded end rings to designate proper cable to switching connections.

Dual Legacy Kit
HV-DLKT-CT6

The Dual Legacy kit comes complete with a Harmony table box available in a choice of aluminum or black finishes, an HDMI/VGA switcher and all required cables finished with color coded end rings to designate proper cable to switching connections. Each kit includes all the necessary hardware, a pre-installed two AC / two USB bracket and a small bracket with space for two Keystone snap-in jacks. With CEC and auto sense, compatible displays will automatically turn on when you connect a source, and turn off after a delay when the last source is disconnected making the system more user friendly and energy efficient. As each user connects, the system will automatically switch to the correct input or use the simple push buttons. Each package can be upgraded with optional retractors.

The accompanying DV-AFSSW-21COC is an HDMI, VGA and Audio to HDMI switcher. This switcher has one HDMI input supporting resolutions up to 4k x 2k @ 60Hz and one VGA AHD-15 input supporting resolutions up to 1920 x 1200 @ 60Hz. The DV-AFSSW-21A has a locking 12v power supply and can be controlled via front panel push-buttons, contact closures, or RS-232 via Phoenix 3-pin, or Auto-sensing. The DV-AFSSW-21A provides LED Feedback for contact closures.

What’s in the Box!

- Two AC / Two USB Bracket
- Blue Acrylic Table Top
- AHD-15 Input
- Color Coded End Rings
- One HDMI Input
- One VGA Input
- Phoenix 3-pin Selection
- Front Panel Push Buttons

Dual Digital Kit
HV-DDKT-CT6

The Dual Digital kit comes complete with a Harmony table box available in a choice of aluminum or black finishes, an HDMI/VGA switcher and all required cables finished with color coded end rings to designate proper cable to switching connections. Each kit includes all the necessary hardware, a pre-installed two AC / two USB bracket and a small bracket with space for two Keystone snap-in jacks. With CEC and auto sense, compatible displays will automatically turn on when you connect a source, and turn off after a delay when the last source is disconnected making the system more user friendly and energy efficient. As each user connects, the system will automatically switch to the correct input or use the simple push buttons. Each package can be upgraded with optional retractors.

The accompanying DV-HSWS-21A 2x1 HDMI multi control auto switcher is capable of supporting up to 4k x 2k @ 60Hz resolutions in a small footprint. This switcher has a locking 12v power supply and can be controlled via front panel push-buttons, contact closures, or RS-232 via Phoenix 3-pin, or Auto-sensing. The DV-HSWS-21A provides LED Feedback for contact closures.

What’s in the Box!

- Two AC / Two USB Bracket
- Blue Acrylic Table Top
- AHD-15 Input
- Color Coded End Rings
- One HDMI Input
- Phoenix 3-pin Selection
- Front Panel Push Buttons

Quad Universal Kit
HV-QUKT-CT6

The Quad Universal kit comes complete with a Harmony table box available in a choice of aluminum or black finishes, a four HDMI® input scaling switcher, and all required cables finished with color coded end rings to designate proper cable to switching connections. Each kit includes all the necessary hardware, a pre-installed two AC / two USB bracket and a small bracket with space for two Keystone snap-in jacks. With CEC and auto sense, compatible displays will automatically turn on when you connect a source, and turn off after a delay when the last source is disconnected making the system more user friendly and energy efficient. As each user connects, the system will automatically switch to the correct input or use the simple push buttons. Each package can be upgraded with optional retractors.

The accompanying DH-HDSS-41-Tx scaling switcher is a true HDMI® 4-Play output that transmits HD Video (up to 4K 60Hz), Audio, Bi-Directional RS-232 Control, Ethernet, and Power via one CAT-6A shielded cable out to 100 meters. Due to the scaling engine, the DH-HDSS-41-Tx can switch itself and the display on (via CEC or RS-232) and goes to that input. Plug a new source in & the switcher will automatically go to the new input. Kit can be upgraded with an optional set of four retractors.

The accompanying DH-TESS4K-41A is a multi-format presentation switcher mounted under table channels or optional retractors. This switcher provides a Remote Pushbutton Interface, RS-232, IP Control, and Web GUI.

What’s in the Box!

- Four HDMI® Inputs
- One Audio Input
- One Power Input
- One CAT-6A Shielded Cable
- Front Panel Push Buttons
- Control Room USB Hub
- 1U Height System Mounting Bracket
- 1U Height Under Table Channels

Quad Digital Kit
HV-QDKT-CT6

The Quad Digital Kit comes complete with a Harmony table box in a choice of aluminum or black finishes, a four HDMI® input multi-format scaling switcher, bracketry, and all required cables. Each kit includes all necessary hardware, a pre-installed 2 AC / 2 USB bracket, a small bracket with space for three Keystone snap-in jacks, under table channels or optional retractors. This switcher provides a seamless, auto-mated collaboration system that’s simple to use. Just plug in your source and the DH-TESS4K-41A will switch itself and the display on (via CEC or RS-232) and goes to that input. Plug a new source in & the switcher will automatically go to the new input. Kit can be upgraded with an optional set of four retractors.
Dual Digital Kit
HV-DDKT-C7G
The Dual Digital Kit comes complete with a Harmony table box available in a choice of aluminum or black finishes, an HDMI/VGA switcher and all required cables finished with color coded end rings to designate proper cable to switching connections. Each kit includes all the necessary hardware, a pre-installed two AC / two USB bracket and a small bracket with space for two Keystone snap-in jacks. With CEC and auto sense, compatible displays will automatically turn on when you connect a source, and turn off after a delay when the last source is disconnected making the system more user friendly and energy efficient. As each user connects, the system will automatically switch to the correct input or use the simple push buttons. Each package can be upgraded with optional retractors.

The accompanying DV-MSW-21A is a small bracket with space for two Keystone snap-in jacks. With CEC and auto sense, compatible displays will automatically turn on when you connect a source, and turn off after a delay when the last source is disconnected making the system more user friendly and energy efficient. As each user connects, the system will automatically switch to the correct input or use the simple push buttons. Each package can be upgraded with optional retractors.

Dual Legacy Kit
HV-DLKT-C7G
The Dual Legacy Kit comes complete with a Harmony table box in a choice of aluminum or black finishes, a four HDMI® input multi-format scaling switcher, bracketry, and all required cables. Each kit includes all necessary hardware, a pre-installed two AC / 2 USB bracket, a small bracket with space for three Keystone snap-in jacks, under table channels hardware, a pre-installed two AC / two USB bracket and a small bracket with space for two Keystone snap-in jacks. With CEC and auto sense, compatible displays will automatically turn on when you connect a source, and turn off after a delay when the last source is disconnected making the system more user friendly and energy efficient. As each user connects, the system will automatically switch to the correct input or use the simple push buttons. Each package can be upgraded with optional retractors.

The accompanying DV-T6SS4K-41A is a multi-format presentation scaling switcher with four HDMI® inputs and one main output. Looking for a breathtaking 4K scaled output, then this is the switcher for you. It allows any HDMI® source (e.g., Blu-ray disc™ player, HD DVD player, satellite receiver, gaming console, etc.) to be shown on the main output display closures. This HDMI® and HDCP 2.2 compliant device supports up to 4K@60Hz YUV 4:4:4 HDR and supports high dynamic range 10/12-bit (HDR10). There are four methods of remote control: Remote Pushbutton Interface, RS-232, IR Control, and Web GUI.
