## What FSR's **Floor Boxes** Deliver

The FL-200 floor box offers a compact multi-trade design with separate compartments for line voltage that support standard and extra-deep devices in 3" or 4" deep box options.

The FL-200-SF4-C cover mounting kits allow FSR's SmartFit 4" series round covers to be installed on an FL-200 box.

The FL-300 floor box delivers discreet and powerful floor connectivity with furniture-feed capability, creating a direct cable pathway from floor to furniture.

# Our *Wall Boxes* Create a Hidden Infrastructure for a Clean, Connected Family Space

---

Our wall boxes offer a clean, concealed way to organize AV gear, smart home devices, and power connections, perfect for media rooms, home offices, and behind displays. With multiple sizes and adjustable shelves, they keep your technology hidden, accessible, and performing flawlessly.

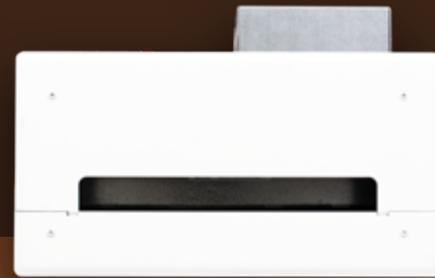

## What FSR's **Wall Boxes** Deliver

The PWB-100 wall box is installed easily in the wall behind any display, allowing your screen to sit flush against the wall.

Supporting both new and existing construction, the PWB-100 provides a secure environment for audio, video, control, and power connections.

FSR wall boxes feature attractive paintable covers that conceal connectors and store excess cable.

# Wall Boxes Built for Reliable Outdoor Connectivity

Bring power and AV outdoors with secure, weatherproof wall boxes that blend seamlessly into patios, kitchens, and entertainment areas. Available in flush or surface mount styles, they offer flexible, durable solutions without compromising design.

## What FSR's **Outdoor Wall Boxes** Deliver

Built for reliable outdoor connectivity, the OWB-500P outdoor wall box features durable construction with a locking cover door that protects against dirt, rain, sleet, and snow when not in use.

The OWB-500 provides flexibility with internal adjustable brackets for various control panels and plates available in surface and flush mount models.

The OWB-CP1 outdoor wall box is designed to mount a variety of control panels, including hard switches, elastomeric pads, touch screens, and infrared pickups.

# Ceiling Solutions for Immersive Entertainment Spaces

FSR's ceiling boxes and touchscreen enclosures bring smart integration to your home, securely housing projectors, AV components, and control panels without sacrificing style. Paired with Digital Ribbon cables for high-performance 4K/8K transmission, they ensure a clean, connected experience from ceiling to screen.

## What FSR's **Ceiling Boxes** Deliver

- Our ceiling boxes provide secure equipment storage that supports projectors up to 100 lbs., with lockable access doors and a dual-tilting equipment shelf for serviceability.
- With a solid door option, the CB-22+ maintains a clean, concealed integration with room aesthetics while keeping AV components hidden yet accessible.
- Smart design features include an optional temperature-controlled fan, keeping equipment from overheating

## What FSR's **Digital Ribbon Cables**

- Delivering long-distance performance, our digital ribbon cables can transmit HDMI signals up to 328 feet without loss in signal integrity
- Ready for today's ultra-high-definition demands, they support both 4K and 8K resolutions with reliable clarity.

## What FSR's **Wall Plate Covers** Deliver

- Flush-mount touchscreen wall plate covers offer an adjustable depth mounting plate for the flexibility of installing deeper touchscreen panels

*Side Entry Device Box*

## What FSR's *Smart-Way Raceway* Deliver

The Smart-Way raceway delivers versatile cable management for any space, offering a sleek, stylish solution to power all your essential equipment.

With flexible installation options, the Smart-Way raceway can be placed on top of or in any flooring to maintain a clean design without disrupting the environment.

Smart-Way offers many entry points into a room, but FSR's flush in-feed option is a paintable, seamless design from the outside and a functional cable entry point inside the wall

The flush in-feed is a discrete solution designed for transitioning cables from the wall into the Smart-Way raceway.

The decorative cover is available in slate or a paintable white cover to match the interior, which conceals the wall opening and any installation gaps.

The side entry device box is equipped with two power and two data positions and includes one brush insert and two decora blanks.

Side entry device box comes in a discreet slate finish.

# Tabletop Power Solutions for Inspiring Creative Spaces

## What FSR's **Table Boxes** Deliver

FSR's Symphony table boxes bring power and connectivity for your work and creative spaces with elegant, curved aluminum housings that maintain modern aesthetics while supporting AV connections.

Available in clamp-on or under-table styles, Symphony boxes are installed easily on or under desks and tables, offering convenient accessibility to power, charging, and data.

Customizable to any environment, the Symphony Collection offers preloaded or assemble-to-order models with options for outlets, USB charging, and multiple color combinations to match room décor.

With a small footprint in a 3 1/2" round design, our T3-AC2 table boxes provide unobtrusive access to AC power and network access in creative spaces.

FSR table boxes bring professional-grade power and connectivity to home offices, craft rooms, and homework stations, keeping cables hidden while ensuring devices stay charged and ready. With multiple styles to suit any setup, they're a smart addition to any creative space..
