Your Cables. Under Control.

From under-table routing to retractable BYOD connectivity—
FSR cable management keeps every space clean, flexible, and professional.

Deploy. Retract. Done.

From meeting tables to collaboration hubs, our retractor solutions bring order to every connection point. Designed for meeting spaces, each retractor keeps cables neat, accessible, and out of the way so your team can focus on what matters.

A **cleaner tabletop** starts here.

Cable Pilot Retractors

Simple, reliable, clutter-free connectivity designed for modern meetings.FSR's on-table retractors were designed to sit neatly beneath the touch controller, providing an elevated meeting flow and user experience. Available in compact 7" x 7" or 7" x 10" models, these retractors extend up to 6 feet and connect directly to your touch controller for clean cable deployment every time. Ideal for Microsoft Teams Rooms, boardrooms, huddle spaces, and shared touchdown areas.

The Cable Pilot under-table retractor keeps cables hidden below the work surface while providing smooth, reliable access with up to 5' of cable payout. Compatible table-port options, edge-port, and RT6 or CT6 table box configurations support flexible installation, helping maintain a clean, organized table surface without sacrificing connectivity.

The **right path** for every cable.

Block

Block Cable pathway with mount-bracket for attach-ment to Smart-Way device box. *Sold as complete assembled part.

Slide

Block & Slide

Modern cable pathway solutions are designed to guide wiring from table to floor with style. Both versions offer a sleek, adjustable link system that complements any environment and gracefully hides cable clutter. Ideal for height-adjustable desks, conference room tables, or any workspaces cable management is needed.

Under-Table Channel

An unobtrusive horizontal pathway for routing cables across the underside of any table. The flexible entry edge allows cables to drop in at any point, while mitered ends support clean, continuous layouts.

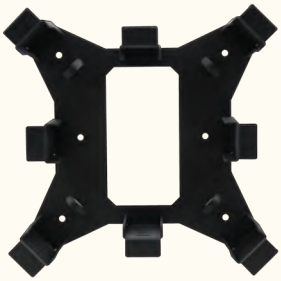

Engineered for **durability**.

QuikPost Cable Retention Post

Snap-on cable retention for ladder racks that install instantly, requiring no tools. Prevents cable spillover, improves organization, and saves valuable time on every project. A dependable choice for data centers, server rooms, transportation hubs, hospitals, and schools.

Wiring Star

A fast, tidy way to organize excess cable under tables, desks, podiums, and credenzas. Its dual-coil design keeps multiple cables neatly separated, protected, and accessible. Built-in mounting points and included tie wraps make installation quick and professional.

Under Table Rack

Mount and manage AV gear directly beneath the table surface. This compact rack features a removable shelf for easy servicing and integrates smoothly with our under-table channels. Perfect for conference tables, collaboration rooms, classrooms, or anywhere equipment storage and cable management are needed.

One Room, One Connected System.

A successful UC&C room depends on every part of the physical infrastructure working together. FSR solutions bring power and data to the table, guide and conceal cabling, provide clean BYOD access, organize equipment below the work surface and behind the display, and protect room controls at the wall. Together, Smart-Way QuiK, cable management pathways, Cable Pilot retractors, table boxes, under-table racks, wall boxes, and touchscreen covers create a cleaner, more cohesive space that is easier to connect, use, and support.
