Audio Gain Control Panel

FSR

Audio Products Group

ACP

The ACP Audio Gain Control Panel simplifies, in an elegant way, the task of controlling audio gain in any type room. This ACP consists of a Decora type single gang wallplate, containing the volume up/down pushbutton switches, and LED level indicators for easy user access. This also enables the installer to mount multiple ACP units in a multi-gang electrical box sharing a common wall plate.

The product is shipped with two single gang wall plates in white and black. The actual Decora style insert is supplied in a black finish.

- ACP Insert mounts in any Decora type wall plate allowing easy custom design
- Discrete LED bargraph indicator for easy to read volume status confirmation
- Selectable bar or dot mode of operation via a jumper on the board
- Switches provide positive tactile feedback
- Compatible with the FSR IT-VCM Volume Control Module
- Wide operating voltage range
- Screw terminal connections for quick and easy installation

SPECIFICATIONS

Signal Input Impedance	20 Kohm
Full Scale Adjustment Range	1.5 to 25 VDC (trimpot adjustable)
Keyswitching Rating (up/down)	30VDC @ 30ma (10M cycles mechanical life)
Finish	White or Black
LED Color	Yellow
Intensity	5.0 MCD typical
Supply Voltage	8 to 30 VDC
Supply Current	75 mA max bar mode; 25 mA max dot mode
