Flex Tech Note # 1

Flex Reserved Characters

There are a few characters that the Flex .ADF file uses for various functions that should not be used when creating IR or Serial libraries.

Reserved Character List

<
>
\
'
"
%
&

These characters should not be used in command names for Serial, IR or IP devices or in Serial or IP commands. If a device requires one of the Reserved Characters, you should substitute the HEX equivalent.

Substitution Table

Reserved Character	HEX Equivalent
<	<3C>
>	<3E>
\	<5C>
'	<27>
"	<22>
%	<25>
&	<26>

Example

Required Device Command -   TEST%
Should be Entered as -   TEST<25>
