

## 4K 7x1 Multi-format Presentation Switcher DV-MFSS-71

Based on firmware revision 1.12 and FSR1.0.0.Q

244 Bergen Blvd Woodland Park NJ 07424 973-785-4347 [www.fsrinc.com](http://www.fsrinc.com)

## PROPRIETARY INFORMATION

All information in this manual is proprietary to and the property of FSR Inc. This publication is protected by the Federal Copyright Law, with all rights reserved. No part of this document may be reproduced, transcribed, or transmitted, in any form or by any means, without prior explicit written permission from FSR Inc.

## UNPACKING

The DV-MFSS-71 7x1 Switcher package includes the following items:

- DV-MFSS-71 7x1 switcher
- IR remote control
- Rack ears
- Under table brackets
- User's manual
- 12VDC 4A power supply
- 8 Screws
- 9 3-Pin screw terminal

- HDMI is a trademark of HDMI licensing, LLC.
- DisplayPort
- Specifications may be changed without any notice in order to improve the function of the product.

## LIMITED WARRANTY

The DV-MFSS-71 is warranted against failures due to defective parts or faulty workmanship for a period of three years after delivery to the original owner. During this period, FSR will make any necessary repairs or replace the unit without charge for parts or labor. Shipping charges to the factory or repair station must be prepaid by the owner, return-shipping charges (via UPS Ground) will be paid by FSR.

This warranty applies only to the original owner and is not transferable. In addition, it does not apply to repairs done by other than the FSR factory or Authorized Repair Stations.

This warranty shall be cancelable by FSR at its sole discretion if the unit has been subjected to physical abuse or has been modified in any way without written authorization from FSR. FSR's liability under this warranty is limited to repair or replacement of the defective unit.

FSR will not be responsible for incidental or consequential damages resulting from the use or misuse of its products. Some states do not allow the exclusion of incidental or consequential damages, so the above limitations may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

Warranty claims should be accompanied by a copy of the original purchase invoice showing the purchase date (if a Warranty Registration Card was mailed in at the time of purchase, this is not necessary). Before returning any equipment for repair, please read the important information on service below.

### SERVICE

Before returning any equipment for repair, please be sure that it is adequately packed and cushioned against damage in shipment, and that it is insured. We suggest that you save the original packaging and use it to ship the product for servicing. Also, please enclose a note giving your name, address, phone number and a description of the problem.

NOTE: all equipment being returned for repair must have a Return authorization (RMA) Number. To get a RMA Number, please call the FSR Service Department (1-800-332-FSR1). Please display your RMA Number prominently on the front of all packages.

## **SURGE PROTECTION DEVICE RECOMMENDED**

This product contains sensitive electrical components that may be damaged by electrical spikes, surges, electric shock, lightning strikes, etc. Use of surge protection systems is highly recommended in order to protect and extend the life of your equipment.

## **SAFETY**

- All the safety and user manual should be read before the appliance is operated.
- The safety and operating instructions should be retained for future reference.
- Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.
- Do not use this equipment near wet place.
- This product should be operated only from the type of power sources indicated on the marking label. If you are not sure of the type of power supplied to your home, consult your local power company.
- This equipment may be equipped with a 3 wire grounding-type plug, a plug having a third (grounding) pin. This pin will only fit in to a grounding type power outlet. This is a safety feature. If you are unable to insert the plug in to the outlet, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the grounding-type plug.
- Openings on the case are provided for ventilation and to ensure reliable operation of the equipment and to protect it from overheating. The openings should never be blocked.
- Do not use any damaged power cords or plugs, or loosed outlets, this may cause electrical shock or fire.
- Do not put heavy articles such as other equipment on this product. Keep it away from liquid, magnetic and flammable substances.

## DESCRIPTION

The DV-MFSS-71 7 x 1 Seamless Switcher has been designed to address the needs of the corporate, education, medical, and houses of worship fields. It can be easily operated from the front panel or remotely with a Flex Control System to create a powerful and cost effective switching system.

The DV-MFSS-71 features 4 HDMI, 1 Display Port, 1 DVI and 1 HD-15 video inputs. The HDMI inputs are HDCP compliant and accept resolutions up to 4K 2160p (3840x2160) @ 30Hz. The HD-15 input supports VGA, RGB, and YPbPr input up to 1920x1200 @ 60Hz.

The DV-MFSS-71 has an HDCP compliant output that supports resolutions up to 4K 2160p (3840x2160) @ 30Hz. Each of the inputs is scaled to match the output resolution and switching between them is seamless and instantaneous, meaning no still frame or black screen during switching.

The HDMI input has embedded audio along with analog stereo inputs. The DisplayPort, DVI and VGA also have an analog stereo input. There is an additional analog input that is mixed into the audio output for voice over program applications. All analog audio inputs are via captive screw terminals. The HDMI inputs support up to 7.1 multichannel embedded audio. The audio can follow the video during switching or can be switched separately in breakaway mode. Audio outputs are available either embedded on the HDMI port, via the multi-channel digital coaxial, or via stereo analog out connectors.

## FEATURES

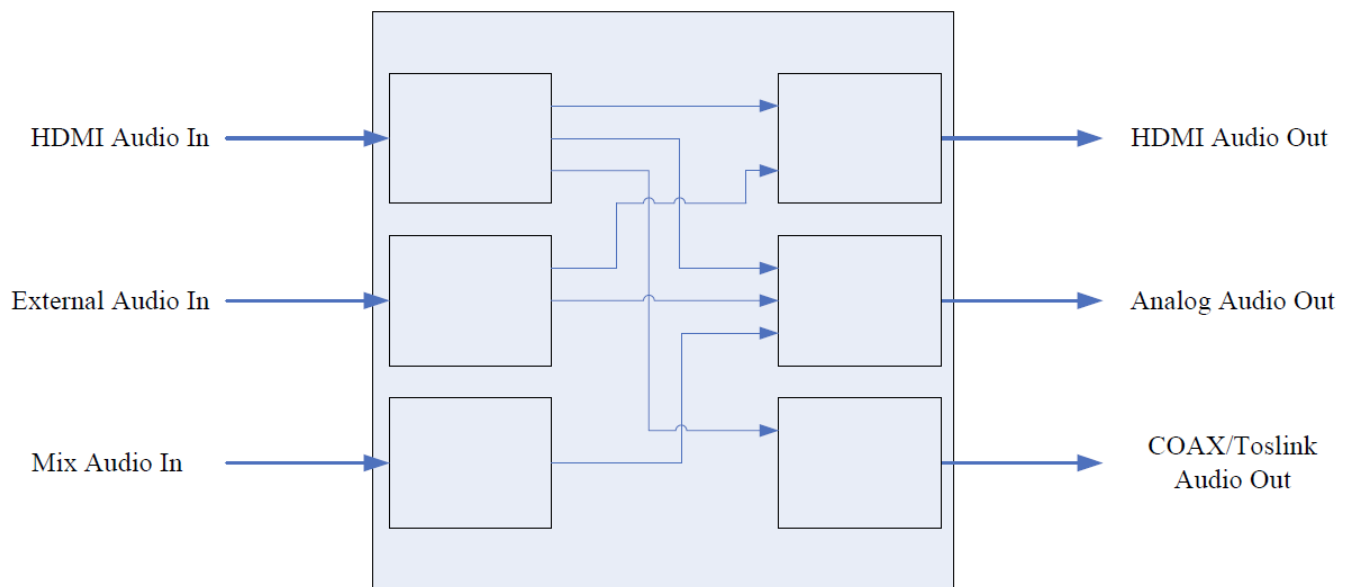

- Upscaler and downscaler 7x1 switcher
- 4 HDMI, 1 DisplayPort, 1 DVI, 1 VGA (RGB/YPbPr)
- HDMI up to 4kx2k 30Hz and DisplayPort up to 4kx2k 60Hz
- HDMI output supports resolutions up to 4Kx2K 30Hz
- Each source input is automatically scaled to match the optimal output resolution
- Each input also has an unbalanced stereo audio input via captive screw terminals
- Coax and HDMI supports up to 7.1 audio channels
- HDCP compliant
- Additional mix Stereo audio input
- Easy-to-use front panel control, Web GUI, IR, RS- 232 and Telnet.
- Can be controlled via FSR's FLEX Touch Panel Control System with pre-made templates available.
- 1 RU Height, 19" wide with rack ears
- VGA input with auto adjust

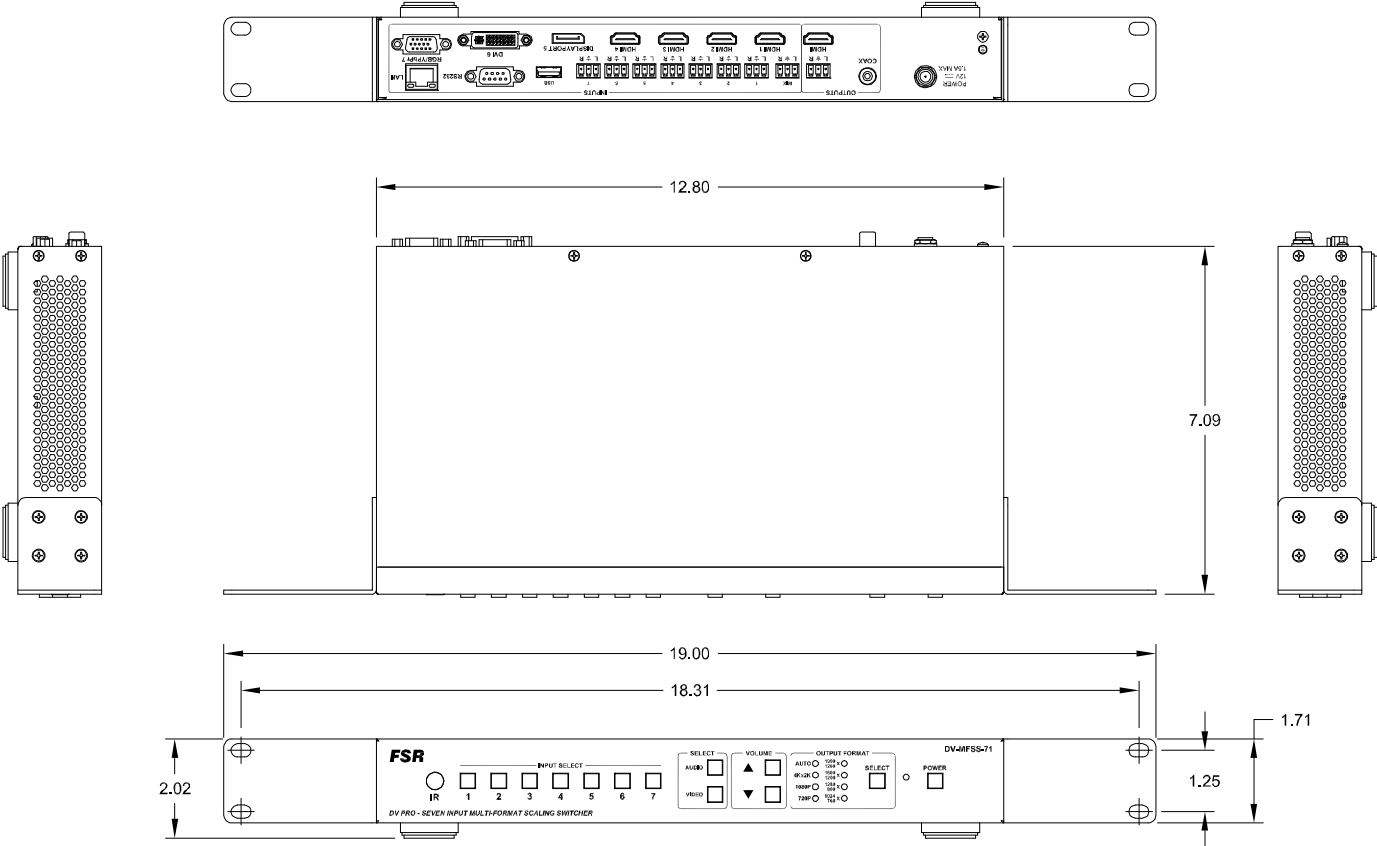

## TYPICAL APPLICATION

2	Input select*
3	Video and Audio select
4	Volume up and down
5	Output resolution
6	Power ON and OFF (Standby)

\* The VGA auto adjust command can also be executed by pressing and holding the input 7 switch for 3 seconds. (See below)

## VGA INPUT AUTO ADJUST BEHAVIOR:

The DV-MFSS-71 switcher will automatically adjust to new VGA sources when they are first connected. The process will take several seconds during which time the image will move around the screen until the optimal scaler settings are determined. Once a particular source is learned, the switcher will recognize it and readjustment will not be necessary. Up to 10 unique sources can be stored in the unit's memory, after which additional sources will result in one of the others being overwritten. If for any reason the image does not display correctly, the auto-adjust process can be triggered manually by pressing and holding the input 7 switch for 3 seconds.

REAR PANEL

6	Output resolution Auto (Display's native resolution) → 4Kx2K 30Hz → 1920x1080 60Hz → 1280x720 60Hz → 1920x1200 60Hz → 1600x1200 60Hz → 1280x800 60Hz → 1024x768 60Hz

## ON SCREEN DISPLAY (OSD)

	Selected input and its input resolution
	Selected input state and DV-MFSS-71's IP address
	VGA auto adjust
	5 Volume
	DV-MFSS-71's IP address and port number
	Mute
	Unmute
	<b>IMPORTANT: Do not power OFF or remove the USB drive during the firmware upgrade.</b>

## IP SETTINGS

There are two methods to obtain the IP address:

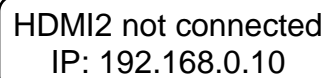

1. Obtain the IP address and port number via the information from the on-screen display (OSD).
2. Obtain the IP address and port number via the IP CONFIGURATION TOOL APPLICATION.

The following presents the two methods:

### OSD

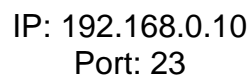

Obtain the IP address and port number via the information from the OSD:

When there is no signal, the following OSD in the window will be displayed:

HDMI2 not connected  
IP: 192.168.0.10

Or when an image is displayed, the IP information is displayed in the area above the middle of the window.

IP: 192.168.0.10  
Port: 23

The IP address in this example, is 192.168.0.10 and the port number is 23.

## IP CONFIGURATION TOOL APPLICATION

To obtain the IP address and port number via the IP CONFIGURATION TOOL APPLICATION:

Download the application "FSR\_DV\_71\_74\_Switcher.exe" file from the FSR Document Library at [www.fsrinc.com](http://www.fsrinc.com).

NOTE: Make sure the PC and DV-MFSS-71 are on the same network.

Run the application on the PC to show the main screen:

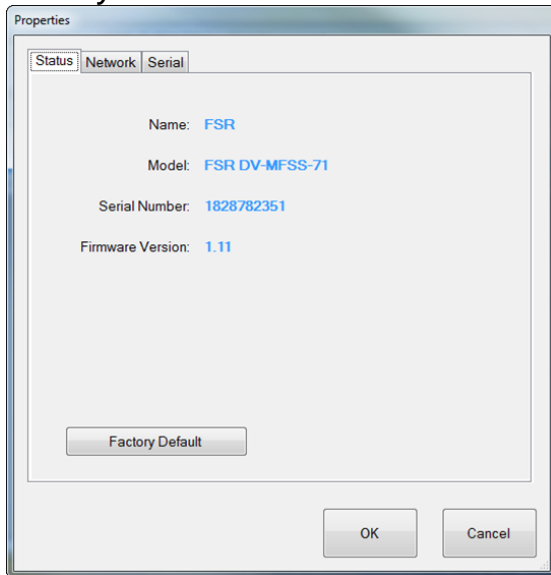

Click *Device Search*, the following device list is shown. Select the device, and click *Settings*

The screen defaults to the *Status* tab where the DV-MFSS-71's information is shown.

The DV-MFSS-71 settings can be returned to factory default by clicking *Factory Default*.

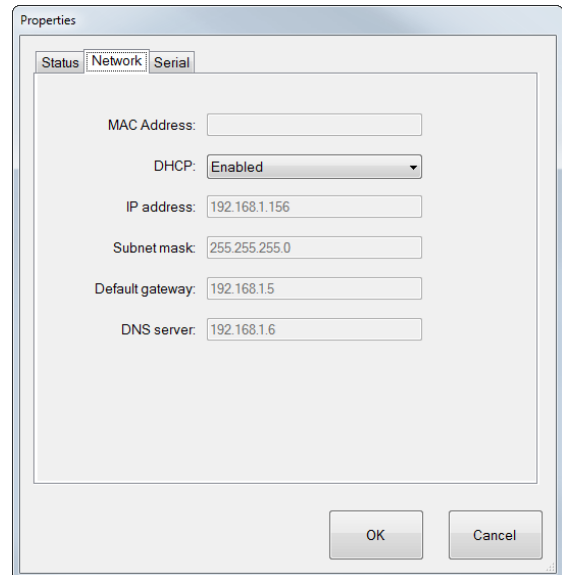

The 'Properties' dialog box has three tabs: 'Status', 'Network', and 'Serial'. The 'Status' tab is selected. It displays the following information:

- Name: FSR
- Model: FSR DV-MFSS-71
- Serial Number: 1828782351
- Firmware Version: 1.11

At the bottom of the main content area is a button labeled 'Factory Default'. At the bottom right of the dialog are 'OK' and 'Cancel' buttons.

Click the *Network* tab to view the DV-MFSS-71's IP information. DHCP is enabled by default. The static IP address can be entered manually by disabling the DHCP via the pulldown menu.

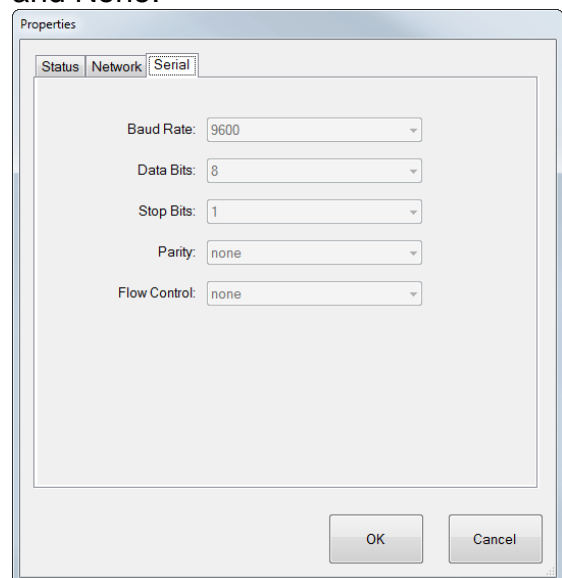

The 'Properties' dialog box has three tabs: 'Status', 'Network', and 'Serial'. The 'Network' tab is selected. It displays the following network configuration options:

- MAC Address: (empty text field)
- DHCP: Enabled (pulldown menu)
- IP address: 192.168.1.156 (text field)
- Subnet mask: 255.255.255.0 (text field)
- Default gateway: 192.168.1.5 (text field)
- DNS server: 192.168.1.6 (text field)

At the bottom right of the dialog are 'OK' and 'Cancel' buttons.

The *Serial* tab is an informational screen that will display the DV-MFSS-71 serial port settings. The settings are fixed at 9600, 8, 1, None and None.

The 'Properties' dialog box has three tabs: 'Status', 'Network', and 'Serial'. The 'Serial' tab is selected. It displays the following serial port settings:

- Baud Rate: 9600 (pulldown menu)
- Data Bits: 8 (pulldown menu)
- Stop Bits: 1 (pulldown menu)
- Parity: none (pulldown menu)
- Flow Control: none (pulldown menu)

At the bottom right of the dialog are 'OK' and 'Cancel' buttons.

Single commands may be sent to change the display capabilities of the unit by clicking on ***SEND COMMAND***.

Select either *Ethernet* or *Serial* radio button

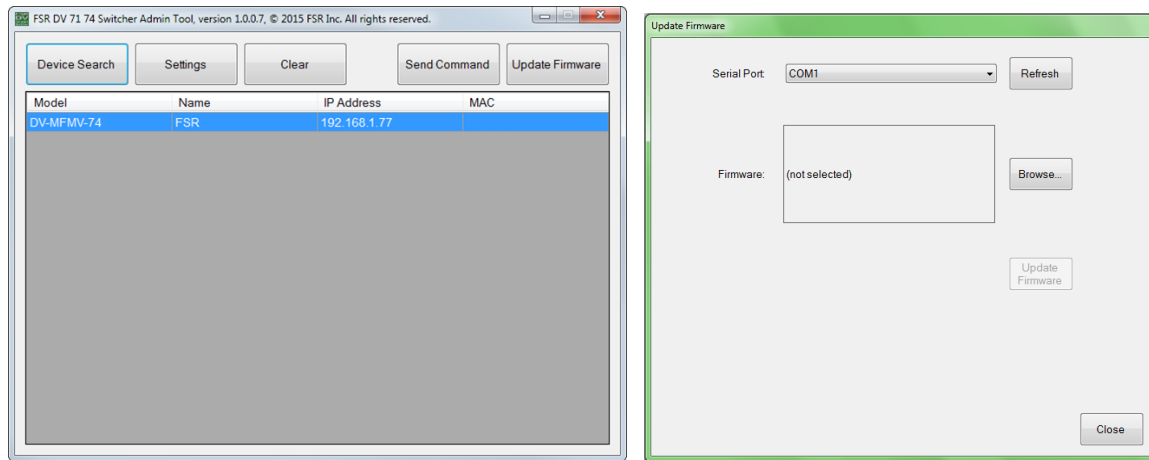

Select the appropriate COM port or Ethernet address.

Then either select a predefined command or enter a user defined command.

Click the ***SEND*** button to send the command:

## FIRMWARE UPDATE (EXTERNAL CONTROL BOARD)

Download the update file from the FSR website doc library.

(Example: FSR\_741\_20xx\_xxxx\_xxx.frm)

1. Connect a Serial straight-through cable to the DV-MFSS-71's RS-232 port. If present, disconnect the Ethernet cable from the LAN port.
2. Turn on the DV-MFSS-71 and wait for it to finish booting up before proceeding to the next step.
3. Click on "Update Firmware".
4. Select a Serial port.
5. Browse for the location of the firmware file.
6. Click on "Update Firmware" and wait for its completion.
7. Power cycle the DV-MFSS-71 by disconnecting the power supply.

The current firmware version can be obtained from the "Status" tab.

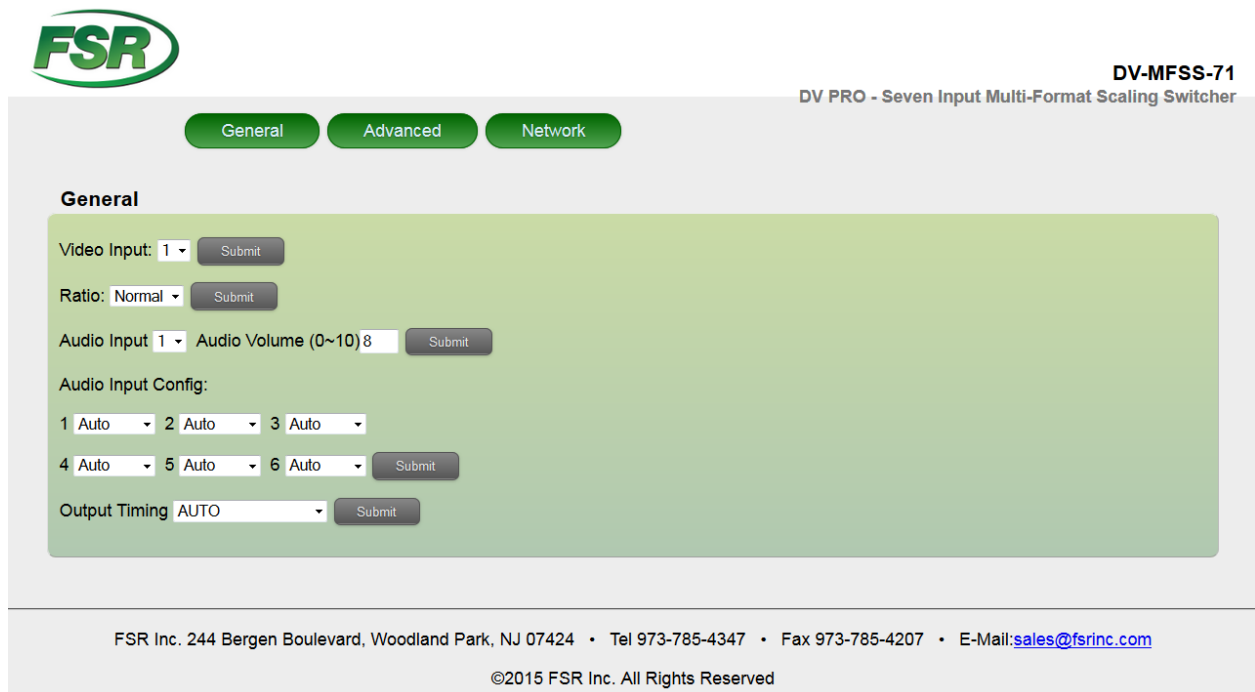

**IMPORTANT: Do not power OFF or remove the Serial cable during the firmware upgrade.**

## EMBEDDED WEB SERVER

The DV-MFSS-71 can be controlled via a Web browser, which contains General, Advanced and Network settings. For more information about how to obtain the IP address, see the section on “IP SETTINGS”.

For example, the obtained IP address is 192.168.0.115

Type 192.168.0.115 in the address bar of the web browser

The screenshot displays the web interface for the DV-MFSS-71, a DV PRO - Seven Input Multi-Format Scaling Switcher. The interface features the FSR logo in the top left corner. The title bar on the right reads "DV-MFSS-71" and "DV PRO - Seven Input Multi-Format Scaling Switcher". Below the title bar are three tabs: "General", "Advanced", and "Network", with "General" currently selected. The "General" settings page includes the following controls:

- Video Input:** A dropdown menu set to "1" with a "Submit" button.
- Ratio:** A dropdown menu set to "Normal" with a "Submit" button.
- Audio Input:** A dropdown menu set to "1" and **Audio Volume (0~10):** a text input field set to "8", both with a "Submit" button.
- Audio Input Config:** Six dropdown menus labeled 1 through 6, all set to "Auto".
- Output Timing:** A dropdown menu set to "AUTO" with a "Submit" button.

At the bottom of the interface, the following contact information is displayed:

Ex: Volume Up	ATM 09 VOL_CRL W +	09 VOL_CRL W +
Volume request	ATM 08 VOL_CRL R	08 VOL_CRL R VOL_CRL Y
X = (0-A, + = Up or - = Down), 10 = A Y = (0-A), 10 = A Volume control for HDMI and analog audio out.		

## **FIRMWARE UPDATE (AUDIO AND VIDEO BOARD)**

Download the MERGE.BIN file from the FSR website doc library

The DV-MFSS-71 can be updated through a USB drive as follows.

1. Copy the MERGE.BIN update file to the root directory of a blank USB drive.
2. Connect the USB drive to the USB service port on the rear of the DV-MFSS-71. If present, disconnect the Serial and Ethernet cable from its respective port.
3. Connect the HDMI output of the DV-MFSS-71 to a display.
4. Turn on the DV-MFSS-71 and wait for it to finish booting up before proceeding to the next step.
5. Press and hold Input Select 1 until, "System upgrading..." appears on the display. During this process the button indicators will blink at a steady rate.
6. The DV-MFSS-71 will reboot automatically after loading the firmware.
7. Power cycle the DV-MFSW-71 by disconnecting the power supply.

The firmware version can be obtained using the "firmware version request" command.

**IMPORTANT: Do not power OFF or remove the USB drive during the firmware upgrade.**

## SPECIFICATIONS

Supported Formats	
Input	HDMI video up to 3840x2160 30Hz and audio up to 7.1Ch DisplayPort up to 3840x2160 60Hz DVI up to 3840x2160 30Hz VGA (RGB/YPbPr) up to 1920x1200 60Hz
Output	HDMI video up to 3840x2160 30Hz and audio up to 7.1Ch Stereo analog audio Coax audio up to 7.1Ch
Connectors	
Input	4 HDMI Type A 19-pin, female 1 DisplayPort (Full Size) 20-pin, female 1 DVI, female 1 VGA HD-15 15-pin, female 7 Program audio inputs via captive screw terminals 1 Mix audio input via captive screw terminals
Output	1 HDMI Type A 19-pin, female 1 Stereo via captive screw terminals 1 Coax
RS-232	1 DB-9, female
LAN	1 RJ-45
USB	1 Type A 4-pin, female
Power consumption	12VDC, 1.5A Max
Physical	
Dimensions (W x H x D)	12.8" x 1.71" x 7.09" (326mm x 43.5mm x 181mm)
Unit Weight	6lbs (3.3kg)
