**FLUSH MOUNT
IN-FEED BOX**

The Smart-Way Flush In-Feed provides a low-profile solution for transitioning cables from the wall into the Smart-Way Raceway. Designed for both power and data, the in-feed mounts directly in the wall and sits flush for a clean look. A removable divider inside the box maintains separation between power and data cables. The sloped back simplifies cable entry, while dual decorative covers ensure a finished appearance by concealing the wall opening and any installation gaps. It's ideal for applications requiring an aesthetic design and offers a paintable white cover option to match any interior.
