

Goodbye, Cable Clutter

Cable Pilot gives you more ways to keep cables accessible, protected, and out of the way. From on-table retractors to under-table models, table-port pass-throughs, edge-port options, and CT6 / RT6 table box integrations, there's a Cable Pilot setup for the way your meeting spaces are built. Whether the retractor sits on the table, under the table, through the table, or inside an FSR table box, Cable Pilot helps keep BYOD connectivity clean and ready when users need it. HDMI, USB-C, and CAT6 options support Microsoft Teams Rooms®, classrooms, huddle spaces, and UC&C environments without leaving loose cables across the work surface.

Cable Pilot now gives you more ways to bring retractable connectivity to the table.

On-Table Retractors

Compact 7" x 7" and 7" x 10" HDMI and USB-C retractors designed to sit beneath the touch controller, delivering up to 6 feet of clean BYOD cable access.

Under-Table Retractors

Hidden below the table surface, CPRT-UT models provide 5 feet of cable payout for HDMI, USB-C, and CAT6 applications while keeping the workspace clear.

Edge-Port Option

A clean pass-through solution for under-table retractors mounted behind an apron or table skirt, helping guide the cable smoothly from below the surface.

*Under-table retractor sold separately

Table-Port Option

A simple round tabletop pass-through for CPRT-UT retractors, giving users a clean single cable access point right where they need it.

*Under-table retractor sold separately

CT6 Table Box Options

Integrate up to three Cable Pilot under-table retractors into a CT6 table box while leaving room for power, charging, and keystone connectivity.

*Under-table retractor sold separately

RT6 Table Box Options

Build one or two Cable Pilot under-table retractors into an RT6 table box for a clean, compact solution with room for additional table box inserts.

*Under-table retractor sold separately
