

**Make Every
UC&C Room Easier to
Join, Use, and Support**

Unified Communications and Collaboration bring tools such as calling, chat, video conferencing, audio conferencing, file sharing, presence, and meeting platforms into a single, connected user experience. But the room only feels connected when the physical AV infrastructure works just as well as the software.

That is where UC&C rooms often break down. Users walk into a space and face exposed cables, unclear laptop connection points, inconsistent room controls, power and data in the wrong location, visible equipment behind the display, and hardware that is difficult to access when service is needed. Other UC&C challenges include misaligned platforms, inconsistent room experiences, disconnected systems, and rooms that fail to keep pace with evolving collaboration workflows. FSR products help make the room feel like a single, cohesive system: easy to connect, easy to control, easy to maintain, and ready for how people meet today. See on the back how FSR's products help solve the physical side of the UC&C experience.

FSR infrastructure solutions help turn meeting rooms, huddle rooms, classrooms, training spaces, and boardrooms into cleaner, more intuitive UC&C environments.

Cable Pilot

- Provides simple, organized BYOD connectivity with retractable HDMI or USB-C cables for Microsoft Teams Rooms and collaboration spaces.
- Available in multiple mounting options, including on-table, under-table, edge ports, and FSR table boxes.
- Extends cables up to 6 feet and retracts them after use, keeping the tabletop clean and ready for the next meeting.

Flush-Mount Touch Screen Cover

- Protects touchscreens with a locking metal enclosure and impact-resistant window while maintaining visibility and usability.
- Features an adjustable-depth mounting plate, touch-to-open locking door, and 180-degree hinge for easy access.
- Supports various 7- and 10-inch touch panels and is available in surface-mount and CMU wall-mount models.

Smart-Way Quik

- Complete floor raceway solution in one box, including the in-feed, raceway, device box, receptacle, brush insert, and end stop.
- Low-profile, ADA-compliant design available in 6-, 9-, and 12-foot lengths for bringing power and data to tables.
- Ideal for UCC spaces where connections need to extend into the room while keeping cables protected and out of sight.

PWB-320

- Creates a clean, organized display wall by concealing AV, IT, power, and cable-routing equipment behind the display.
- Designed for standard 16-inch on-center stud bays with integrated mounting options, cable management, grounding, and installation hardware.
- Keeps equipment hidden yet easily accessible for maintenance and service, reducing clutter and simplifying support.

Under Table Rack

- Mount AV, digital, and data equipment beneath the table to keep technology accessible but out of sight.
- Provides 1RU of standard 19-inch rack space with removable rails, a built-in lock, and a two-stage safety release.
- Removable lower shelf allows easy equipment and cable access while maintaining a clean, organized installation.

RT6 Table Box

- Combines AV, IT, and power connections into a single, convenient tabletop access point.
- Available in multiple shapes and sizes with low-profile hideaway doors and support for a wide range of connectivity solutions.
- Creates a meeting-ready table by reducing cable clutter and providing clear, organized connection points.

Block and Slide Cable Management

- Creates a clean, modern cable path from the table to the floor for a polished appearance.
- Designed to route wiring neatly for height-adjustable desks, collaboration tables, and other furniture.
- Helps reduce exposed cables and visual clutter by carrying connections from the floor raceway to the work surface.
