

FL-700 PASS THRU FLOOR BOX

Metal Products Group

FL-700

**Scrub water approved for
carpet, tile, and wood floors!**

DESCRIPTION

The FL-700 floor box is designed for conference rooms, auditoriums, classrooms, etc. where it may be necessary to pass cables thru the box without interfering with the various connectors. This simplifies installation of wiring when a group of boxes must be connected in series. The pass thru route is front to back. The FL-700 is used on carpeted floors over concrete. This floor box provides a practical and safe solution for easy access to cables and connector plates. The lift-off section of the cover allows full access to internal cables and connector plates while a smaller, hinged trapdoor flips back to create a cable exit. All cables can be stored within the box when they are not in use, allowing unencumbered travel in the area.

The sturdy 11 gauge steel cover is installed flush with the floor. The low profile edging is 1/4" high and is available in brass or aluminum. When the box is not in use, only the elegant, hand mitered carpet edge is visible.

Inside the FL-700, one angled bracket is provided for cable connections with ample clearance for cable connectors.

The angled brackets provide two single and one triple gang opening, which are all isolated for maximum safety.

The FL-700 is extremely sturdy (steel and welded construction) and has been designed to fit the needs of power, audio, video, telecommunications, and data applications.

Note: When this box is used on grade, it should be encased in concrete to prevent contact with the grade. To ensure compliance, we recommend using the FSR Pour Pan Accessory.

SPECIFICATIONS

Size:	Box: 8" x 14" x 5 1/4" Cover: 8" x 14" Material - 1/8" steel
Edging:	Height: 1/4" in beveled or square profiles Material: Brass or Aluminum
