

HV-1000CT6 4 PERSON TABLE BOX SYSTEM

DESCRIPTION

The HuddleVU system allows for multiple users to share and view their laptops, tablets, and smart phones screens on a main display. Unlike conventional presentation systems, anyone participating can be a presenter or the audience at any given time at the push of a button. LED's indicate which user is currently live and when the system is busy to each user.

HuddleVU creates the ideal environment for people to view and share ideas. The systems include all the necessary video switching equipment, control hardware, display power control and color-coded captive HDMI cables. It is a very simple yet effective system to quickly install and use.

The **HV-1000CT6** single table box system employs a single FSR CT6-4B-BLK table box that allows 1 to 4 users to plug in and power their laptops or other input devices and simply push a button to display their desk-top information on the main display. Any user can switch to their own laptops, tablets, and smartphones at any time simply by pushing their own button on the CT6-4B-BLK housing.

An HV-CTL Controller and up to two DV-HSW4K-41 HDMI Switchers are included on all systems. The HV-CTL has a power switch, two AC outlets to power the DV-HSW4K-41 HDMI Switchers and an additional AC outlet to power the main display. The HV-CTL is the main termination point for the system components. When four or less inputs are used the HV-CTL switching can be serially controlled by an external control system.

FEATURES

- Collaborate and share ideas on your computer screen with others
- One button press inclusion of users
- No software or programming required
- Simple installation
- Create attractive workspaces
- Hardware and cables included
- Conversion kits available for VGA and audio input
- Systems with four or less inputs can be controlled by an external control system

APPLICATIONS

- Classrooms
- Libraries
- Conference rooms
- Educational facilities
- Corporate Teleconference Rooms
- Learning Centers
- Training Rooms
