FL-1200 with Hinged Door in Black Sandtex

DESCRIPTION

The FL-1200 is a unique floor box designed for wooden stage and computer floors. This box provides a practical solution for power, audio and video cable termination and connection. Its dual door design allows full access when making connections while only having a small cable opening when in use.

The cover of the FL-1200 is painted with Black Sandtex paint.

There are two knockouts, one on the rear and one on the bottom.

The FL-1200 is a one piece, all welded design. This makes for an extremely sturdy and easily installed box. The inserts are removable with just 2 screws for easy installation and connector repair.

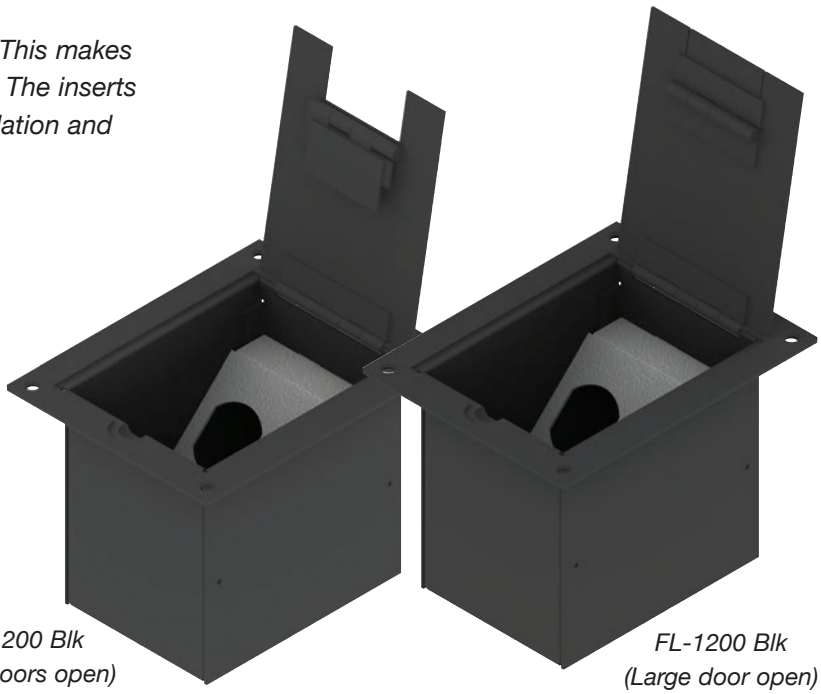

The FL-1200 is shipped with three different insert plates. One of the plates has provision for two switchcraft D[*] male or female connectors.

The second plate is punched out for one duplex receptacle. The third plate is blank and can be punched by the contractor or manufactured by FSR.

See back for more details.
