Patent Pending

Built-in box securing clamps

NEW

Gang Plate Dust Covers use part # FL-600P-DCIH for ordering.

DESCRIPTION

Introducing the FL-400, a new concept in floor boxes. Designed to be installed in wood, concrete or raised access floors, this 5-inch deep box features our Patent Pending Clamps to secure the box in place.

Plenty of knockouts around the box vary in sizes from ½" all the way up to 2". The FL-400 includes all the necessary internal plates and brackets to make pre- and post-pour compartment changes quick and easy. Using this system, both high and low voltage configurations, along with compartment isolation, can be implemented "on the fly." This feature makes just about any cabling/connector scenario possible.

The compartments inside the box are on one side only, leaving plenty of space for storing direct boxes/throw down boxes, or storing cables.

The cover is a new hinged design with the popular U-Access latch. No tools are necessary to open or close the box. You have 13 different cover options, which include the popular brass and silver carpet or wood edging, to match the designer's requirements.

FSR has been designing and manufacturing floor boxes for over 35 years. Our innovative designs handle the rigors of a floor environment while blending into your floor designs.
