

CB + MLS Series

Ceiling Boxes with Pre-wired Modular Linx System

CB-12-MLS

CB-22-MLS

CB-224-MLS

FSR ceiling box products meet the Build America Buy America Act (BABAA) and TAA requirements

DESCRIPTION

With the MLS pre-wired ceiling boxes, the electrical contractor can install and power the MLS starter cable at any time during the initial construction phase. The CB-MLS eliminates coordinating return visits to the site to connect AC to the ceiling box after the AV contractor completes hanging the unit. The AV contractor will now be able to complete the AV install without multiple trips to the site. They can mount the unit, install the AV equipment, wire, and test without waiting for the electrical contractor to connect the AC to the mounted, empty ceiling box.

FEATURES

- Pre-wired ceiling box with MLS 2' drop cable
- Provides the ability to install and power at the beginning of the construction phase
- Eliminate return visits to connect power after ceiling box is mounted
- Mount, install equipment, wire, and test all in one visit
- CB-MLS saves time and money
