SMART-WAY RACEWAY

FSR

Power Products Group

On Wall → Ceiling to Baseboard → Raceway Solution

DESCRIPTION

The Smart-Way wall raceway kit solves the challenge when in-wall access is an issue. This kit allows you to route on the wall from the ceiling down to the base-board and into the floor raceway. The wall raceway kit provides a solution for walls that are fire rated, brick, concrete, solid columns, exterior walls and walls with interior blocking. The kits include designer-styled edging for the raceway and are esthetically pleasing. They are available in slate gray or aluminum finishes. Our finishes can be over-painted to match the interior wall color. You simply design the Smart-Way into your room and watch it disappear. It is intended for offices, conference rooms, collaborative work environments, classrooms, or anywhere access into your walls is restricted.

FEATURES

- *Routes cables from the ceiling to the floor when interior wall access isn't feasible*
- *Seamless design makes running cabling down the wall attractive*
- *Provides an attractive on-wall cable management solution in Slate Gray or Aluminum finishes*
- *Raceway compartments offer ample space for power, Communications, and A/V requirements*
- *Design this into your space and watch it disappear*
- *Aluminum raceway is suitable for over painting to match interior wall color*

APPLICATIONS

- *Concrete columns*
- *Exposed Block Walls*
- *Brick Walls*
- *Fire-Rated Walls*
