

DSKB-TSW-570 TOUCHSCREEN MOUNTS

Metal Products Group

DSKB-TSW-570

DESCRIPTION

Our popular DSKB line has expanded to include two new sizes, tailored explicitly for the Crestron TSW-570 touchscreen. These models mark a significant evolution in the DSKB product line, offering dedicated support for portrait and landscape mounting orientations. Originally designed to support standard gang wall plates and IPS devices, the DSKB family has become an essential accessory for touchscreens, AV control systems, switch panels, and keypad installations. This addition broadens the range of supported devices and reflects the growing importance of desktop and shelf-mounted touchscreen solutions in professional AV. Constructed of durable steel and finished in textured black, these mounting consoles are designed to protect equipment from damage or theft while enhancing usability.

The DSKB-TSW-570-LS and DSKB-TSW-570-PT units are particularly valuable for integrators who require flexible deployment of advanced touchscreens in spaces where wall mounting is either impractical or undesirable. Each unit incorporates a 45° angled front panel, making it easier for users to view and operate mounted devices in both seated and standing positions. With their ergonomic tilt and rugged construction, these models deliver both professional aesthetics and long-term reliability. By elevating and protecting equipment off the wall, the DSKB Series provides integrators with a flexible deployment option that adapts to boardrooms, classrooms, hotels, control rooms, and other demanding environments.

FEATURES

- Supports portrait or landscape orientation for Crestron TSW-570
- Ergonomic 45° angled surface for improved visibility and usability
- Durable steel construction with a black textured finish
- Provides protection against accidental damage and theft
- Suitable for applications in boardrooms, classrooms, hotels, arenas, lobbies, houses of worship, and control rooms
