Table-Port Options for UT Retractors

Table-Port Grommet Mounts

DESCRIPTION

FSR's Cable Pilot delivers clutter-free connectivity for Microsoft Teams Rooms® and other collaboration spaces. The Cable Pilot on-table retractors 7" and 10" models provide a compact, reliable solution for HDMI and USB-C cable management, keeping your meeting tables organized and professional. Cable Pilot eliminates the messy cables stretched across your meeting table by neatly housing an HDMI and USB-C cable. The BYOD cable can then be quickly deployed up to 6 feet when needed and retracted when the meeting is complete.

The under table Cable Pilot line keeps the retractor hidden below the work surface while still giving users reliable cable access. Provided brackets allow multiple mounting orientations, & the 4-roller cable nozzle supports smooth cable deployment of 5' of payout.

The table port or grommet options provide a clean way to pass a single cable through the tabletop when paired with a CPRT-UT under-table retractor. The CPRT-TP1 mounts in a 2⅜"(60 mm) to 2½" round hole with a black or clear anodized aluminum rim. The CPRT-GR mounts a retractor under various size and colors table pass through grommets. These solutions help keep the cable path neat on the table surface.

The edge port accessory is designed for installations where the under-table retractor needs to sit behind a table skirt or back from the table edge. It helps guide the cable from the hidden retractor to the user-facing access point without the retractor sitting at the table's edge.

Under-table retractors can be integrated into T6-CPRT and CT6-CPRT table boxes configurations to keep the work surface organized while preserving connectivity access.
