

Flush Mount Touchscreen Covers

Your Ultimate Touchscreen Security Solutions

Metal Products Group

Flush Mount 10" Shown

DESCRIPTION

FSR's flush-mount touchscreen wall boxes are metal-locking covers with impact-resistant plexiglass windows that protect and restrict access to 5- to 10- inch touch panels mounted on a 2-gang back box. Panels with other mounting requirements can be supported; contact the factory for details. The flush-mount is designed to blend seamlessly with any environment and features a sleek, flush profile.

The 180° hinge design allows the door to lie flat against the wall when open, providing users with unencumbered access to the front panel and making maintenance and operation hassle-free. The enclosure can be installed in landscape or portrait orientation; in landscape, the door can be mounted to open left or right; in portrait, the door swings up or down. Our flush mount touchscreen wall boxes provide security against unauthorized access while allowing users to monitor the control panel's status through the window without opening the locked door.

FEATURES

Flush Mount Model

- Adjustable depth mounting plate for flexibility
