

SYMPHONYCONNECT

**On, Clamp, Under,
and In-Table Boxes**

FSR table box products meet the
Build America Buy America Act
(BABAA) and TAA requirements

Metal Products Group

Symphony Connect

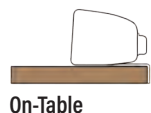

DESCRIPTION

Built for portable table environments where accessible power is a necessity, Symphony Connect supports tablets, laptops and other personal devices. This latest evolution in FSR's table box line introduces a modular, daisy-chainable power system that eliminates the need for hardwiring.

This innovative solution allows up to six units to be interconnected using pluggable cables with a combined reach of up to 50 feet. With under-table, in-table and on-table mounting options, in a stylish black finish, Symphony Connect brings flexible, code-compliant power to any adaptable workspace.

The sophisticated 65W charging module supports "Multiport Shared Capacity Charging" protocol allowing multiple modern devices to charge at the fastest rate. Connecting multiple devices simultaneously will share the total maximum 65 watts of available power. Engineered with locking connectors and 65 watts of charging for laptops and phones, this system ensures safe, convenient, and uninterrupted power.
