Surface Mount 7" Shown

Combination Locking Surface Mount 7" Shown

CMU Wall Mount 7" Shown

DESCRIPTION

FSR's surface-mount touchscreen wall boxes are metal, locking covers with impact-resistant plexiglass windows that protect and restrict access to 5- to 10- inch touch panels mounted on a 2-gang back box. Our surface mount touch-screen wall boxes provide security against unauthorized access while allowing users to monitor the control panel's status through the clear window without opening the locked door. The 180-degree hinge design allows the door to lie flat against the wall when open, providing users with unencumbered access to the front panel and making maintenance and operation hassle-free.

FSR has expanded its touchscreen wall plate cover family with the introduction of 7" & 10" combination-locking models. Designed to support 7" and 10" touch panels, this model incorporates a 3-digit resettable combination lock for keyless entry. The combination lock offers convenience and added protection in environments where managing multiple keys is impractical.

The CMU wall mount enclosure provides a secure environment for touch-screens that need to be mounted to a non-penetrable wall surface. The combination locking access door and ADA compliance makes it the perfect solution for schools, event spaces, convention halls and maintenance corridors or any CMU construction. The combination lock is provided with a master key to open the door, determine the combination, and set the lock to your desired 3-digit code.

FEATURES

Surface Mount Models

- Mounts a variety of 5", 7", and 10" 2-gang touch panels (VESA and 3-gang mounts available)
- Available in surface mount and flush mount (See ordering chart for further details)
- Locking metal door for enhanced security
- Fully supported clear acrylic window for monitoring panel status without opening the door
- Sleek, low-profile design

Combination Locking Model

- 3-digit resettable combination lock for keyless security

CMU Wall Mount Models

- Secure touchscreen mounting for non-penetrable wall surfaces
- Combination-locking access door for controlled entry
- Master key allows authorized users to open the door and manage the lock
- Resettable lock can be programmed with a custom 3-digit code
- ADA-compliant design
- Ideal for CMU construction in schools, event spaces, convention halls, and maintenance corridors
