

PWB-353 ProjectWall Box

THE LITE WITH A BRAIN

See reverse side for details.

CONFORMS TO UL STD 60950-1
CERTIFIED TO CSA STD C22.2 NO. 60950-1

DESCRIPTION

The PWB-353 Wall Box has an open face design with a white interior and white extended trim ring, rather than a closed cover. This model facilitates quick access to cables and connectors without cover removal. There are multiple knockouts for power and openings for up to 6 single IPS connector plates. At 3" deep, it is designed for use in 3" or 4" stud walls. The extended trim ring provides a clean appearance while covering rough cuts in the drywall created during installation.

The units are in stock for a quick delivery. They are Made in the USA, and have been creatively engineered and manufactured responsibly!

An accessory enclosure cover (FSR#52547) is available for AC line isolation and pass-thru (See drawing).

ADD IPS PLATES

Add IPS to your installation! We now offer "labeled IPS plates" at no additional cost. Custom labeling and logos can also be added for a small charge. In the photos, you will notice examples of IPS plates mounted in the PWB units. The IPS Planner on our web site will help you design your plates simply and efficiently.

FEATURES

- Rugged 16 gauge steel back box
- Simple installation
- Hardware included
- Quick access to the cables and connectors
- Multiple knockouts in a variety of sizes
