

CB SERIES DRYWALL FRAME & CEILING BOX KIT

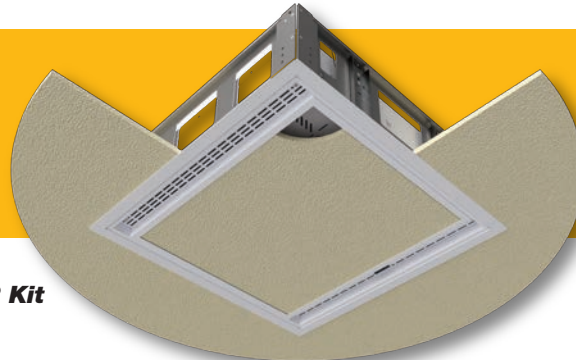

Metal Products Group

CB SERIES DRYWALL
MOUNTING FRAME KIT

Patent 9,966,752

CB-12-SR Kit

CB-22-SR Kit

DESCRIPTION

If you want to mount our ceiling boxes in a drywall ceiling, you need our frame kit. Our CB-22 and CB-12 ceiling boxes and SR drywall frames have joined forces and are now available as a kit. This kit can be used anywhere you need to mount equipment in a drywall ceiling, or where you are mounting a projector or display in the ceiling. The CB-22-SR mounting frame kit is designed to easily mount our 2'x2' (CB-22) ceiling box in drywall. For a smaller footprint, the CB-12-SR mounting frame kit is designed to easily mount our 1'x2' (CB-12) ceiling enclosure in drywall. The mounting frame kit can be installed in the ceiling opening using threaded rod, stranded wire cable, or screws through specific holes in the sides of the unit. The ceiling box can then be hung vertically, via the included cables, while the equipment is mounted and wired allowing convenient access to the components and cables. The ceiling box can then be lifted into the frame and locked into place. The ceiling box interior can be accessed in the same way for future re-cabling and service. The ceiling box can be lowered for convenient access and lifted back into the frame. The ceiling box interior can be accessed in the same way for future re-cabling and service.

APPLICATIONS

The "FRAME" kit is combined with FSR ceiling boxes. The ceiling kit can be used anywhere you need to mount equipment in the ceiling, or where you are mounting a projector or display in the ceiling.

Popular install sites include:

- Conference Centers
- General Meeting Facilities
- Airports
- Museums
- Lunch Rooms
- Corporate Offices
- Schools
- Training Facilities
- Medical Facilities
- Retail Environments
- Sports Bars & Restaurants

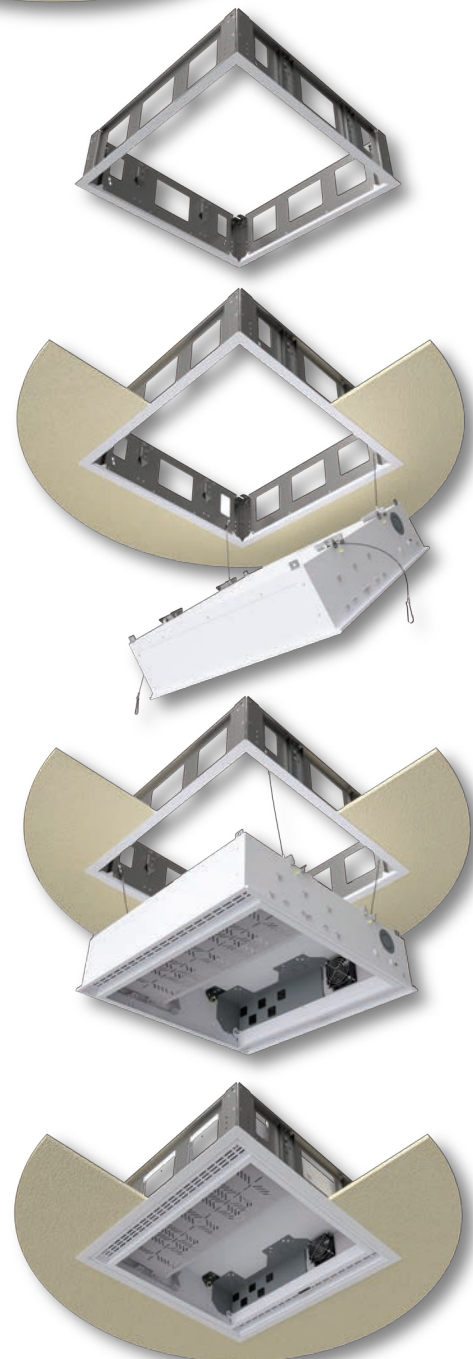

APPROVALS

All FSR ceiling products are agency listed, including plenum rated.
