

## **TB-XG** **Table Box**

# **FSR**

**Metal Products Group**

TB-XG

*At last, there is a table box that can be customized to match the aesthetics and decor of any conference table while providing the connector options required by consultants and clients. The FSR TB series of table boxes handle media, computer, audio, video, and power connections with style and elegance.*

*This revolutionary line of boxes and their unique customizing options allow both consultants and clients to choose what the box will look like in advance, and to provide for the future connectivity needs of the users.*

*The table boxes are available in a variety of sizes, cover finishes, and cover designs. The boxes are available in 2 gang and 3 gang standard configurations. Standard electrical boxes are mounted on the frame, eliminating the need for regulatory approvals.*

*The cover options are unique and upscale and meet the aesthetic demands of architects, consultants, and clients.*

*Cover finishes include solid brass, or black anodized aluminum.*

*The table boxes have provisions for mounting standard electrical back boxes. Each trade can provide their own back box and wall plate as needed. The back boxes then slide into the clamps on the table box in any order. An adjustable mounting frame on the table box allows for a perfect install*
